

Appl. No. 10/654,288  
Amdt Dated: Feb. 27, 2006  
Reply to Office Action of Nov. 25, 2005

### **REMARKS**

Applicant appreciates the Examiner's indication of allowabilities of Claims 1-20.

In this office action, it is said that there is no antecedent basic for "the retention member" in Claims 1, 6, 7, 8, 9, 14 and 18.

Regarding Claim 1, the limitation of "a flexible retention member attached to the mounting frame" can be found in Claim 1 before the element "retention member" is cited again.

The element "retention member" in Claims 6, 7 and 8 can be also found antecedent basic since they depend on Claim 1 directly.

Regarding Claim 9, the limitation of "a pair of flexible retention members located at opposite sides of the mounting frame" can be found in Claim 9 before the element "retention member" is cited again.

The element "retention member" in Claims 14 and 18 can be also found antecedent basic since they depend on Claim 9 directly or indirectly.

In view of the foregoing, the subject application as claimed in the pending claims is in a condition for allowance and an action to such effect is earnestly solicited.

Respectfully submitted,

Lin et al.
